

100 Day Plan for IT Manager

Here is a sample 100 day plan for a new IT Manager

1. Assess the current IT infrastructure and systems.
2. Meet with key stakeholders to understand their needs and expectations.
3. Review and update the IT strategy, policies and procedures to align with the organization's goals.
4. Evaluate the IT team's strengths and areas for improvement, and create a development plan for each member.
5. Develop a comprehensive IT asset management program.
6. Conduct a security audit and implement necessary measures to improve the security of the IT systems.
7. Streamline the service desk operations and improve the ticket resolution process.
8. Evaluate and implement the right tools and technologies to support the IT operations.
9. Build strong relationships with key suppliers and vendors.
10. Create a project management framework and prioritize IT projects.
11. Develop a disaster recovery and business continuity plan.
12. Establish a regular reporting mechanism to keep senior management and stakeholders informed about the IT performance.
13. Establish open and regular communication channels with the IT team.
14. Encourage innovation and creativity within the IT team.
15. Encourage teamwork and collaboration within the IT team.
16. Create a training program for the IT team to keep them updated with the latest technologies.
17. Foster a positive and engaging work environment for the IT team.
18. Attend industry events and conferences to stay up-to-date with the latest trends and best practices in the IT field.
19. Engage with the IT community to share ideas and learn from others.
20. Review and adjust the 100-day plan based on feedback and results.
